Step into their shoes

How can you help a struggling child, adolescent or adult?
What challenges will you face?

Our Foundation Degree in Therapeutic Communication and Therapeutic Organisations gives you a deeper understanding of children and adults with educational, social, emotional and behavioural needs.

Using a range of key perspectives, you explore the roots of their difficulties and the demands of working with them.

Our course is accredited by:

APPCIOS
The Association for Psychodynamic Practice and Counselling in Organisational Settings

This two-year course, with October entry, is taught at both the Colchester and Southend Campuses. A BA (Hons) ‘top-up’ year is also available.
