

ESSEXLab Omnibus Survey

The ESSEXLab Omnibus Survey contains both demographic questions and common psychological scales. Demographic information will be used to update your profile in the ESSEXLab participant database. You may edit this data at any time by signing into your [participant account](#).

The other information collected in the Survey will be provided to researchers for use in their individual studies, linked by an anonymous ID code. The ESSEXLab team will not provide any identifying information to researchers, only the data from the Omnibus Survey with your anonymous ID code.

Your participation in this study is purely voluntary, and you may withdraw your participation or your data at any time without any penalty to you.

Your data

The participant database is stored in the Data Archive's secure servers, which are certified to ISO 27001, the international security standard. Decisions taken by participants during experimental sessions will be recorded by the computer software. These decisions will not be linked with your personal data stored on the ESSEXLab Online Recruitment System. Unless otherwise stated during the session, your choices during the experiment will be anonymous, and payments will be made privately and confidentially.

All research done in the Lab has passed ethical requirements, including requirements for confidentiality. See the University of Essex's [ethical procedures](#). Participation in the ESSEXLab Omnibus is optional, but you may be invited to fewer experiments if you do not and researchers are interested in using the Omnibus as part of their research study. You are entitled to request that your data held as part of the ESSEXLab participant database or ESSEXLab Omnibus be removed at any time. To do so, please [contact the Laboratory Manager](#).
